

# Key West WebWorks: Web Hosting

Web Hosting Plans Features	Personal Plan	Business Plan
<b>12 months of web hosting: ANNUAL COST</b> All web hosting fees are paid annually (monthly break out \$15 per mo/ \$20 per mo)	\$180	\$240
<b>ANNUAL COST DISCOUNTS</b> <b>Discount pricing for web design, redesign, &amp; maintenance clients</b>	\$120	\$180
<b>Domain Name Registration</b> \$5 for first domain name, annual cost \$10 additional parked domain names, annual cost	✓	✓
<b>Disk Storage</b>	500MB	1500MB
<b>Data Transfer</b> Our Personal plan comes with 5 GB (gigabytes) monthly traffic free-of-charge. Sites that go over their bandwidth limit are charged \$5 per each additionally generated GB. If you need more bandwidth, consider our Business plan: its 15GB/mo. traffic allowance should meet the requirements of almost any site. The charge for additional bandwidth with the Business plan is only \$3 per each additionally generated GB.	7 GB mo	21 GB mo
<b>Free Sub Domains</b> Subdomains are individual Web addresses built upon a pre-existing domain name, e.g. sub.your_domain.com. For example, if you wish to have a separate web site for your sales department, you could create a subdomain called sales.your_domain.com. This way the URL of your sales web site will look more professional and thus add to the total competence of your web presence.	7	21
<b>MySQL Databases</b> If you wish to have any newsgroups, message boards, forums etc. on your Web site you will need a database. A database is a structured collection of data. It may be anything from a simple shopping list to a picture gallery or vast amounts of information in a corporate network. To add, access and process data stored in a computer database, you need a database management system such as MySQL. When buying a Personal hosting plan from Key West WebWorks, you get one MySQL database, which you can easily manage through the online phpMyAdmin Database Manager, found in the Control Panel. With our Business plan, three MySQL databases are included.	2	6
<b>Domain Parking</b> When you have a domain parked on your account it will act the same way as your primary domain. It will show the same site and any email sent to the parked domain will be delivered to the mailboxes you already have for the primary domain. So for example if you have your_domain.com, your_domain.net, and your_domain.org and need all of them to open your Web site, domain parking may be the right solution for you. With our Personal plan you can have up to two additional domains parked with your primary account. If you need to have more parked domains, consider our Business plan, where six domain parking slots are available.	3	9
<b>FTP Sub Accounts</b> With FTP sub-accounts you can allow other people to manage certain areas of your site without providing them with your account login information. With our Personal plan you can have up to six FTP sub-accounts. If you need more, consider our Business hosting plan, where 18 FTP sub-accounts are available.	9	27
<b>Online WebMail Access</b> Each ICDSOFT account comes with a complete Webmail solution, so you can check your email anytime, anywhere. Your mailbox has its own address book, basic and advanced email filters, as well as multi-language email support. You can view, compose, forward, save, and edit your messages, as well as set privacy options, and customize most other features. Just type <a href="http://www.your_domain.com/webmail/">http://www.your_domain.com/webmail/</a> in your browser, enter your email account username and password, and you are ready to go!	✓	✓

Web Hosting Plans Features	Personal Plan	Business Plan
<b>Unlimited Email Accounts</b>	✓	✓
<b>FTP Access</b> You may use your favorite FTP program to upload and download files anytime from anywhere. You can also set an FTP account for each subdomain you have.	✓	✓
<b>Unix-based</b> Our servers are running a heavily-customized version of Red Hat Linux, one of the most stable server operating systems available.	✓	✓
<b>SMTP, POP3, IMAP Servers</b>	✓	✓
<b>PERL, PHP4, Python, Ruby and TCL</b>	✓	✓
<b>Spam Protection</b>	✓	✓
<b>Anti-Virus Software</b> We employ a simple but very powerful anti-virus solution. When enabled, the anti-virus software will scan all incoming messages. In case viruses are found, the server will not deliver the infected messages to the user's mailbox.	✓	✓
<b>24/7 Technical Support</b> Superior customer service is our highest priority at ICDSOFT. Our highly-skilled technical support team is at your service 24 hours-a-day, 7 days-a-week. You can send your questions or requests through our ticketing system at suresupport.com by simply completing an online form. You will be notified by e-mail as soon as your ticket is answered – within one hour, guaranteed, and often much sooner.	✓	✓
<b>FrontPage 2002 Extensions</b>	✓	✓
<b>Personal CGI-Bin</b>	✓	✓
<b>Password Protected Directories</b>	✓	✓
<b>Secure Socket Layer (SSL)</b> SSL is a protocol that uses encryption to safeguard the transmission of sensitive data. Compatible with all modern browsers, it is wise to use SSL when you process credit card transactions on your website, or when you have password-protected areas of your site.	✓	✓
<b>Server Side Includes</b>	✓	✓
<b>Graphical Hit Counter</b>	✓	✓
<b>Super-fast Servers</b>	✓	✓
<b>Pre-Installed Scripts</b> Site Search Engine, Formmail, Guestbook	✓	✓
<b>Web Site Statistics:</b> The Site Statistics feature found in your Control Panel gives you access to statistics about your Web site, such as hits, visits, etc. Site Statistics are updated once every 24 hours. You can choose basic statistics offered by Webalizer (this is the default setting) or more detailed statistics through AWStats.	✓	✓
